CANADIAN CRUDE OIL REQUIREMENTS

JANUARY 1964

Canadian refineries report that for 1964 they expect to increase refinery receipts of crude oil, condensate and pentanes plus by 6,670,000 barrels to 339,-415,000 barrels (927,000 barrels/day). Receipts of domestic crude are expected to grow 7,409,000 barrels (4%) to 193,567,000 barrels (530,000 barrels/day), while receipts of imported crude are expected to decline 739,000 barrels (1/2%) to 145,-848,000 barrels (400,000 barrels/day).

For the period March, April and May domestic receipts are expected to grow 3, 16 and 10 per cent respectively over the previous year, while exports are expected to grow 12 and 7 per cent in March and April. Total demand for Canadian oil in March and April is expected to reach 25,503,000 barrels (824,000 barrels/day) and 23,186,000 barrels (770,000 barrels/day).

Anticipated receipts by refineries should not be interpreted to be nominations for purchase of crude oil at the field which are released monthly by the major producing provinces.
